Notice of Incomplete Response

1. The communication filed on August 4, 2003 is incomplete with respect to 37 CFR 1.111 and therefore non-responsive to the prior Office action because it fails to particularly point out how the amendments to claims 1, 19 and 22 overcome the applied references of record (see 37

CFR 1.111(c):

(c) In amending in reply to a rejection of claims in an application or patent under reexamination, the applicant or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. The applicant or patent owner must also show how the amendments avoid such references or objections. (examiner's emphasis))

For example, the response fails to point out how the addition of the term "linear" in line 9 of claim 1 distinguishes the claim over the applied references and where, in the description, there is support for this change. Inasmuch as Applicant's description fails to refer to a linear shaped structure (to provide appropriate antecedent basis for claimed terminology as required by 37 C.F.R. 1.75(d)(1)) it is unclear what structural feature disclosed with respect to Applicant's insert member is being relied on by the limitation. Also inasmuch as Applicant's remarks bare little correspondence with the changes made in the claims, the examiner is unable to understand what is being relied on by the change in said line 9.

2. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
